INTRODUCTION

Present but barely visible angels.

The Angels are above us but with us even if you do not see them and even if you do not feel their presence!

Indeed, the Angels are only rarely in the form in which and where we expect them!

The angelology (the study of Angels) has accustomed us to a stereotypical representation of angels, that is to say corresponding to a specific image. But the angels exist in many traditions. They are shown and described in very different ways depending on religions, traditions and spiritual paths. Thus in Christianity the angels are represented in the form of gigantic beings, usually Caucasian, and most of the time under male traits and of course equipped with gigantic wings.

However, there are angels in many spiritual paths including, for example, in monotheistic religions or belief in one God as Judaism, Christianity and Islam.

However, there are also angels in many polytheistic traditions since the beginning of time as in Zoroastrianism, religion of the ancient Persians (predecessor of the current Iranian). This doctrine was professed by Zarathustra ago nearly 3,500 years.

In fact, the representations and characters assigned to the Angels in monotheistic religions were actually inspired by these early representations originating in ancient Persia.

You will also notice representations of angels in Hinduism with the words deva but likewise among American Indians, among shamans in animist and traditional societies...

CHAPTER

1

Angels in different traditions

CONTACT YOUR ANGELS

There are as many representations of angels as traditions starting from very early times.

In the Old Testament book recognized by Judaism and Christianity, the Angels often have a dreadful appearance and are generally formidable and ruthless fighters tracking celestial demons.

Angels often have terrible faces, impressive statures and are heavily armed are showing no mercy for lower spirits, demons, evil entities...

Old Testament angels appear in flames, crowned with dazzling rays of light and with gigantic wings!

They often are armed with swords, armor, helmets and chain mail when they aren't riding animals like a horse for the Archangel Michael slaying the dragon.

In the Bible, the representations of angels were heavily influenced, as already mentioned above, by ancient beliefs of the ancient Persians and especially Zoroastrianism as well in their winged depictions in their separation of Angels (working for the good) and demons (fallen angels) whose missions are malevolent.

In Judaism

In Judaism, angels are often called the «Intelligences» and are divided into ten classes of angels or degrees.

For Jews, the belief in angels is the second largest faith after God's. As in Christianity, the angels are usually invisible beings superior to humans although capable of taking visible forms to communicate with them.

For Jews and Christians, the three common Angels are the Archangels in Christianity, are Gabriel, Raphael and Michael despite having significantly different missions in Judaism.

Thus, in the Jewish tradition, men can talk freely whereas the Angels for the official Christianity, only God, Jesus Christ, the Virgin Mary can communicate with them. But there are also trends of Christianity where it is allowed to do so.

In Christianity

Depending on the traditions and religions, there are different types of celestial beings including Angels.

In the Bible, there are nine Hierarchies each divided into three Heavens from closest men to closest to God, we find:

- First Hierarchy: 1st Choir: Seraphim, 2nd Choir: Cherubim, 3rd Choir: Thrones.
- Second Hierarchy: Choir 1st: Dominions, 2nd Choir: Virtues, 3rd Choir: Powers.
- Third Hierarchy: 1st Choir: Principalities, 2nd Choir: Archangels, 3rd Choir: Angels.

Angels and Archangels are part of the two highest classes of celestial beings, the closest to God in Christianity.

They are the messengers of God and are his intermediaries with men.

The Angels have not always been represented with these wings which are the symbol of travel and freedom.

They can also take human forms, be male or female or appear in both forms depending on the circumstances. If one counts 72 leading Angels, there would be, in fact, thousands. There is even talk of myriads or legions sometimes to designate them.

In this book, we confine ourselves only to tell you how to get in touch with key 72 Angels.

The Angels are eternal and of course have a phenomenal power and authority of which we have little idea as humans.

They have innumerable powers and abilities you will discover by reading those of each of the 72 Angels.

The difference between the Angels and Archangels is that the latter are in charge of the most important actions and more fundamental: missions and capital messages for humanity. Thus, the angel Gabriel announced to Mary that she would give birth to Christ.

Nine Archangels are also responsible for nine categories of celestial beings called Hierarchies as already mentioned above.

However, Christianity officially recognizes three archangels: Michael (also known as Michaël or Mikaël), Raphael and Gabriel.

In Islam

There is also in Islam, a long tradition of Angels and they are often mentioned in the sacred book of Muslims, the Koran.

For Islam, the Angels are also messengers of God and have a role in protecting men.

The main angels of Islam are Mikaël (Michael), Israfil (Raphael), Djibril (Gabriel), Malik and Ridwan.

To conclude

There are actually so many depictions of angels following the traditions, if you want to meet the Angels and contact them requires either that you remain faithful to the representation which is standard in your tradition or, conversely, if you do follow any particular path, do not follow any tradition and imagine the angels as you want.

It is imperative that you put no psychological barrier of any kind or representation if you truly want to be able to contact angels, because otherwise they will be slow to intervene or they will not manifest if you put too many barriers between you and the Angels whether conscious or unconscious.

CHAPTER

2

Who are the angels, really?

CONTACT YOUR ANGELS

For hundreds of years, many accounts attest not only to the belief in angels but they came many times to earth and not only in the West.

In Eastern traditions also it attests to the arrival of wonderful beings in numerous appearances and not only in the usual common form of large beautiful beings with wings.

Thus, these wonderful beings appear spontaneously or after the prayer of one human or more, they come to help humanity incessantly and generally; in a discreet manner.

Most of the time, in serious and urgent cases such as accidents they intervene in human form and then disappear, often without asking for reward and without expecting any thanks.

Countless witnesses claim to have been saved from certain death by beings who appeared from nowhere, as a man but sometimes a woman, who often vanish into nature or in the air after their good action had been accomplished.

Often they look like ordinary human beings dressed like everyone else and without great wings on their back!

As you have seen, the angels, as you represent them or you envision them, are only human representations of higher forms of energy because man needs materialization and visualization of celestial beings. Just as God is a higher form of energy that avoids visual representation in many traditions and even that may not be included in some religions like Islam.

Similarly, the angels are forms of higher energy, the sight is impossible to bear for the eyes of a mere mortal.

Only God, the other angels, archangels, saints and spiritual masters can bear the sight of the first embodiment of Angels!

It is often said that trying to look at an Angel would be like an ordinary

man trying to watch the sun longer than a few seconds. Have you tried it?

If you try to look at the sun in the face, you can not resist long to feel a burning which will quickly become unsustainable and very painful. It is even possible to seriously damage his vision or even go blind if we insist or even if we repeat the experiment several times, even a few seconds.

Archangels and Angels being forms of pure energy vibrating at a high frequency and radiating a dazzling light, they can not appear in its original form to a man in the street!

That's why when he does, mostly, to intervene, the Angel lowers its vibrational level and takes the form in which the person imagines or one that is familiar in tradition, culture or religion of the latter.

So whether you are a follower of Christianity, Judaism or Islam, or any other spiritual philosophy, the Angels appear to you in forms corresponding to those applicable in your tradition, as those under which you imagine the or in forms that may suit you.

If you have no tradition or religious belief, it is not important: the angels will appear as aspects able to call to you and leave you a lasting memory.

Anyway, if you've already read about them or if you intend to do, you will find that the different traditions represent them differently and are endowed with diverse abilities.

Also, to facilitate your contact with them, you will not find here a particular image of the cited Angels. We only talk about features that are common in the different traditions.

Similarly, for the names given to the Angels. They are not all written in the same way in all traditions. Also, do not be too concerned by these names even if they differ from those you know.

It is in fact more important to focus on their own abilities to stumble or to question the different spellings of their names in the different beliefs, traditions and religions.

Angelic Characteristics

Angels are beings of infinite goodness, an unlimited love for God of course but also for people and ready to help us continuously on the condition that we do not wait for them to act on our behalf.

They will always listen to you and, when you ask them something, in any field whatsoever, they will answer you but for that you definitely need to fulfill a number of requirements but which are fairly easy to follow.

The Angels simply ask that :

- That your intentions are positive,
- That you truly believe in them,
- That you act in the area where you want a change or improvement,
- That you do not set too strict time limits,
- That you accept the change regardless of your ideas and / or your behaviors,
- That you live and act in the present moment,
- Let all that you do, you do it voluntarily, by committing to it completely and making your best efforts,

Follow these commandments inspired by the angels and you will be in the best conditions to contact your Angels and fully and quickly benefit from their advice in the following chapter.

Angels really require you to go through this preparation phase for successful communication with them.

Also, in any circumstances, do not neglect these recommendations and make sure to abide. These principles are to become second nature to

you in your contacts with the Angels.

In the angelic contact procedure, knowledge, practice and integration of these principles are the first bars to get on the angelic ladder which will lead you to communicate with your Angels.

Also, from now on, you are entering the world of angels and you are preparing to talk to them or even meet them.

Utter the following little prayer and pledge to do so in the coming months to enjoy this practical guide to contact your Angels and take full advantage of their guidance for changing your life gradually but radically.

Your life changing Prayer

“

Oh, You, dear angels, I begin this under your protection of my own accord and I promise to make every effort to follow your advice in a sincere manner with due patience.

In return, I expect from you practical advice that will help me change my life for the better and not for worse.

I promise to respect my promise because, as I do, you, my angels you will help me.

I thank you in advance. You be blessed for your intercession and bring me into the glory of God!

”

At first, say this life-changing prayer at least once a week. The best would be at least once a day.

Throughout this period, practice at your own pace following the heavenly guidance before attempting angelic communication.

Your intentions are positive

The heavenly beings and especially the Angels are naturally turned to the good and try to spread it around them every second. Obviously if you ask them to help you perform malicious acts or harm other people, they will do nothing for you.

Also, a key to your success in your angelic communication attempts will be your positive intentions. In other words, your intentions must be positive. In any case, having daily positive thoughts is, in general, more constructive and will help you achieve your goals more easily and find greater happiness quickly.

You really believe in the Angels

This seems obvious but it often happens that this «small» detail is the main obstacle to their intervention. If you do not believe enough in them or are skeptical about their ability or power to intervene, then you must expect results proportional to your core beliefs.

Indeed, one must appeal to them with intense faith and deep conviction. This was the observation of most of those who received the intervention of angels, having seen and / or who witnessed their actions, often in extreme cases such as the dangers of serious or fatal accidents. In times like this, many people, even if they have never been very religious, often implore the help of God or angels with such spontaneous conviction that the angelic response is almost instant.

In dangerous situations and sudden dangers, we no longer call for reflection or reason but intuition which then dictates that we use our deepest beliefs even if they have been buried in our memory for a long time.

Thus, many people who benefited from angelic help had learned of the existence of Angels in their childhood and after, forgot about them or no longer thought of them ... until the day when they found themselves in danger.

That day, spontaneously, they appealed to what was more rooted in their memory. In a critical situation, they called God, who then sent them an angel directly. Often these humans, who have benefited from these miracles, became ardent defenders of Angels.

Also, do not wait to find yourself in great danger to appeal to them and believe in them. Do it today! This behavior not only allows you to experience a happier life but also prevent you from finding yourself one day in a very critical situation.

You take action in the area of your life where you want a change or active improvement

Third very important point, sending positive thoughts and firmly believing in the existence of angels is to show your commitment in the sense that you want things to change.

Indeed, positive action will drive your change because the Angels are certainly there to help you but not to act on your behalf. Some people do not know this and, in good faith, pray for the help of an angel and simply wait for his intervention.

After they are disappointed because nothing happens and end up doubting or even not believing in angels. There are also people who do not want to make the effort to transform themselves, praying and waiting for a miracle does not occur without changing the ideas or behaviors that harm them.

These people also are likely to be disappointed if they do nothing! «Take a step towards the Angels (or God) and he will take a hundred towards you,» says a proverb. In other words, even if you do, if only a little effort in the direction of change you hope, relevant Angels will intervene immediately, telling you the path to follow through expert advice, but they will not do the work for you.

You do not set too strict time limits

Another characteristic of a successful angelic approach is the applicant's ability, that means you, to be patient because if you are following all the tips revealed in this Contact Your Angels guide, you have the certainty that you will... contact your Angels!

There is however a factor that you can not control: the time factor. Respecting these recommendations will set into motion a process of realization, but that doesn't mean it will materialize right away.

If you maintain the attitude described in this book, you have the certainty of the materialization of your desires. That is why you are asked to learn patience by taking your time to read all of this book and to not only have the assurance to understand what is said but to adhere to it if you want to get the most out of it. In fact, if you apply the secrets revealed here with skepticism, it's harder to get the best results.

Also, in the same vein, once «read and approved» the angelic principles detailed in this book, and after contacting the Angels as shown later, you open yourself to the celestial energies and, in particular, your Heavenly program which provides what should happen to you based on your decisions and your state of mind at any time.

To be fulfilled by the heavenly program that suits you: have an open mind, practice the tips in this book and be patient! Indeed, if you follow the angelic advice given here, there is no reason that you hope does not happen ... but you do not know when this will materialize.

Give time for things to happen. Do not fix a time limit. One thing is certain: if you stay true to the advice given here, the realization of your wish will not delay.

You accept change, regardless of your ideas and / or your behaviors

You must show yourself to be humble and admit that if you do not have the life you desire, it is because some of your ideas and your behaviors are not suitable and prevent you from living the life you want to have. It is time to question them and change them.

In this context, say to yourself that there is no coincidence in the fact that you have this book in your hands and it is time to consider the necessary changes to your existence. Also, you can invoke the angels as shown below if you need a change or changes in any field whatsoever. If you agree to change sincerely and fulfill the efforts that are essential to this, do not worry anymore. All you ask will materialize.

You live and act in the present moment

Another reason why many people fail to change with the help of angels or not, is that they do not live in the present moment because they are not confident enough. Either they get stuck in a nostalgia that makes them unhappy, or they are afraid of the future and dare not act. But the past is past and there is no use to torture, to blame, to regret or to chase happiness because everything is constantly changing. As for the future, it has not happened yet so why worry or rejoice in events that have not yet occurred and which you also have no evidence that they will happen at all?

Worrying about the past and / or future are two of the biggest bottlenecks in the evolution of all beings. This attitude creates more negative vibrations that paralyze or slow your progress and generates negative emotions. Also, the best way not to undergo these blockages is to live in the present moment. This phrase is used and overused so it is good to clarify what is meant is: «Living in the moment» or «Living here and now» does not mean to not worry about anything and live for the day.

«Living in the moment» or «Living here and now» means following ones intuition in every moment of ones life without being blocked by the events of the past or anxious for situations that have not happened yet. Be convinced of «Living in the moment» or «Living here and now» causes behavioral issued guilt or nostalgia about the past and fear about the future. Go forward by materializing your thoughts, one after the other, through actions. Those that you undertake will result in other actions like a chain of causes and effects that will multiply endlessly. As long as you keep that mindset, you will not have concerns and you will find solutions quickly.

That whatever you do, you do it willingly, by engaging fully and making every effort: body, mind and spirit.

The last condition required here is to not only be content with contacting your angels but to commit yourself completely: body, mind, and soul in applying the guidance they will give you. Do not hesitate and get involved with confidence in yourself and the Angels. Under these conditions, if you show a sincere application in what you do, there is no reason that things will not change for you.

Follow all these commandments inspired by the angels and you will be in the best conditions for invoking them with the best chance to fulfill all your wishes.

CHAPTER

How to contact the main 72 angels

As you were told earlier, according to tradition, there are many angels but for reasons of simplicity, we will present to you the 72 main angels recognized by many of the traditions. Most able to help.

You will find below the list of 72 main Angels with a brief description of each.

When you have a specific request...

1. Concentrate on your problem intensely asking the question that is on your mind and devise the best solution for you. See yourself once this solutions been found : how you feel, what it brings you... Intensely visualise the benefits that this solution gives you.
If you do not have the solution, content yourself on focusing on your problem by asking the question on your mind.
2. Then, go through the list of 72 Angels below and stop at the first that seems best able to assist you and can solve your problem or fulfill your wish.
3. Ask your guiding hand (the one you use to write) on his name and the other hand on your heart.
4. Declare: «Dear (name the chosen Angel), has the following powers (read the sentence about him or at least the power he has on the wish in question), make sure you help me resolve this situation (name it) or fulfill this wish (name it). «
5. Be silent and open yourself to ideas that pop into your mind. Hold and write those that are related to the same situation even if they seem to be the opposite of what you think or what you have done so far. As suggested ideas relate to positive thoughts or benevolent actions, you can be sure that the Angel is with you.
6. Put them in pursuance as soon as possible but with patience, do not forget that! Act while being sure to observe the previous advice and your wishes will be realized and/or you will solve your problems.

Some advice

Whatever the number of problems or wishes on your list :

Take them one after the other
in order of preference.

Only begin the second
if the first is resolved.

Do not worry about the third until
you have solved the second and so on!
